combustion plant.** PAGE 14

Liquid Distributor

MaxiFlow®

MaxiFlow®
Trough and Downcomer

MaxiFlow® Trough and Downcomer Distributor

The MaxiFlow™ family of strong sulfuric acid distributors are designed...

Distributor design, irrigation density, open area and materials of construction (SX, A20) will be selected according to specific process requirements and pressure drop and efficiency goals.

Properly designed Maxiflow™ distributors, in association with Clark Solutions Maxisaddles® allow plant operators to reduce pressure drops by as much as 50% without any loss in mass transfer efficiency.

If you need to improve your acid towers performance go to the real mass transfer specialist.
